What is in baby food?

A recent Congressional Report titled "Baby Foods Are Tainted with Dangerous Levels of Arsenic, Lead, Cadmium, and Mercury" showed that 7 major **baby food** companies sold food to parents for consumption by babies that were **known to have dangerous metals in them**.

What are the dangers of exposure?

The report concluded: "Exposure to toxic heavy metals causes permanent decreases in IQ, diminished future economic productivity, and increased risk of future criminal... antisocial behavior in children... [danger to] infant neurological development..."

What Companies are Included?

Beech-Nut
Earth's Best Organic Hain Celestial Group
Gerber
HappyBABY Nurture
Parent's Choice Walmart
Plum Organics Campbell Soup Company
Sprout Foods

What damages are sought?

Medical cost, lost economic ability, future living.

What are the requirements of the injured party/family?

The individual or family usually has little time devoted to the case. The legal team handles the case, so you can focus your time on therapies and doing what you love.

Do these cases generally settle or do most go to trial?

Most settle. The makers usually understand the large cost of having thousands of trial and jury verdicts so they want to reach a settlement.

What sets your firm apart in handling these cases?

As the father of an autistic son, I understand your situation and will **fight to hold the manufacturers accountable**. We care about each client and family. We will turn over every stone looking for the best outcome for you and your family. You can be confident you're in good hands.

If your child is under 16, has Autism, and was fed baby food, contact us IMMEDIATELY!

When YOU collect, we get paid.

If you can't afford a lawyer we will still help!
